

Activity of experts

Since 1997 we have made out expert reports to the disputes concerning alarm systems electric warning systems for state authorities as tribunals and police. We have made out reports also for legal entities. During our activity we found out for Headquarter of penitentiary service checking of the course of public competitions. We projected security solution of the underground of the Capital City Prague. We found out security audit for Pilsen transport company and for the company WITTE Automotive, as well for FAB (Security policy of the company.) We projected the solution of security for USA PA embassy in Prague and further for USA Parker Hannifin (Industrial security audit.) We help at approval of buildings of reconstructed region tribunals in Chrudim, Chomutov and Děčín.

Further we have taken part in making out of security audits in commercial banks. Our work is based on experience and this time we devote ourselves to the systems including those about which people had not the faintest idea. On our way we meet many wrong opinions and therefore it is good to use the real experience we have.

The range of the offer:

- + Expert judgements
- + Security audits
- + Security solutions
- + Security policy in compliance with ISO
- + Substituting at approval of buildings of security systems

Office of expert witness

Jaroslav SCHOVÁNEK

- Activity of experts
- Projection
- Revision of electro
- Public Orders

Introduction

The office of expert witness coordinates a team of workers which except professional activity successfully realizes further projects in the area of public orders and competitive tendering.

The value is upgraded by high potential of educated people in projection and auditors activities of the office. We perform the projects in very interesting building sites for inland and foreign companies. We have realized the projects of a large complex of training facilities in Bratislava and the Cartographic Centre. This year we make activities in Ukraine, SHKLO and in Russia, Moscow, we perform projects of regulation measuring and controlling of rotation ovens.

In our country we can boast with our contribution in the National Theatre or improving security of Reliquary of St. Maur in Bečov upon Teplá. We also work for the Office of the government or for our army. We can prove by these activities that our team had achieved high quality.

Projection

Since 1994 we have been acting successfully in branch of projecting. We are able to project large buildings and to draw also even very detailed things like extention for family houses. Our office consider every customer as a partner. We make projects of electrical appliances including wirings and switchboards NN. Our office is specialized in low-voltage distributions and thanks to to this specialization and regular instructions from all known producers and suppliers we are able to supply high-quality work. We are able to print our projects in colour on professional printing machines HP Design jet and HP Business Ink jet up to the size DIN A0. If needed, we are able to print up to the size DIN A0 also in colour on the foil. We made more than 229 projects including our foreign aktivity.

At present time we make projects as follows:

- + Electric fire signalization
- + Alarm system - Electric security system
- + Evacuation radio
- + Home radio
- + Warning acustic system
- + Structured cabels including computer network
- + Common TV aerials including digital terrestrial input Satellite antene systems including digital input
- + TV hotel systems
- + Phone switchboards and distributions Home phones and videophone
- + Industrial TV systems and Camera systems
- + Measuring and regulation

Revision of electro NN

Since 1994, we are acting successfully in the area of revision activities. To this time we have realized more than 1210 revisions. We provide revision acts to the revision records-measuring instruments. We let to calibrate regularly our measuring instruments. Our revision technicians are regularly instructed. In case of finding of breakdowns we provide photodocumentation of these findings.
